LEGEND

E: extreme/significant risk; immediate action required; must be managed by senior management with a detailed plan, notify RMO immediately.

H: high risk; senior management attention needed; detailed research and management planning at senior levels.

M: moderate risk; management responsibility must be specified; manage by specific monitoring or response procedures.

L: low risk; manage by routine procedures; unlikely to need specific allocation of resources

Details of Action to be Taken

Actions: (When determining action, refer to Hierarchy of Risk Control.)

Physical Strains & Sprains – Perceived risks minimised by participants given clear instructions of the importance of staying on the designated track and following directions given by leader upon entering the habitats / enclosures/ tours, wearing the appropriate PPE (enclosed shoes), following clear instruction / signage, staying to pathways and following directions of park signage.

Animal Feeding -: To be done only under constant supervision of qualified animal handler. Perceived risk minimised by participants not being able to feed any park animal exhibit other than macropods.

Trip/Fall Hazard – Stork Walk - Perceived risks minimised by participants wearing the appropriate PPE (enclosed shoes), following clear instruction / signage, staying to pathways and following directions of park signage and or tour leader.

Animal Handling – To be done under constant supervision of qualified animal handler. Perceived risk minimised by participants being given clear directions on the correct way to handle animals and given demonstrations by qualified handler prior to handling any animals. (Not applicable to Wetlands Tour)
